1. Release Notes Overview

The Release Notes are a comprehensive overview of the new features and functionality added or enhanced as part of MCIX's latest release. These notes are designed to give you all the information you need to immediately understand and start benefitting from the new features.

For each new feature, we give a high-level description of the functionality, and provide a step-by-step walkthrough, along with screenshots of how to start using the feature.

If you would like to learn more about any new feature, please contact the MCIX support team on support@mcixportal.com who will be happy to answer any questions you have.

2. New functionality

ThitsaWorks provides financial technology solutions for Microfinance Institutions to collect, manage and analyze data needed to run effective operations and to manage risks. We are passionate about solving complex business and social challenges using data as a tool.

3. Tasks

[MCIX-1225] – Restructured loan table to be faster Credit Report

Restructured the loan table to be able to view a credit report and calculation faster.

[MCIX-1415] – Showed the proper message for the files which are rejected by the pre-flight checking

In the previous release, we added new validation rules and rejected the file. In this release, we showed the proper message for the rejected files for the specific error in the file upload section. Users can see the error message by clicking the "View Stats" of each file.

Note: We will reject the entire file if 10% or more of the records of the uploaded file are imported with invalid NRC encoding and invalid date format.

Character encoding error (question marks in NRC fields)
