[MCIX-2883] – Mobile App Issue - Need to do login process again after "Lock App" the application.....	3

1. Release Notes Overview

The Release Notes are a comprehensive overview of the new features and functionality added or enhanced as part of MCIX's latest release. These notes are designed to give you all the information you need to immediately understand and start benefitting from the new features.

For each new feature, we give a high-level description of the functionality, and provide a step-by-step walkthrough, along with screenshots of how to start using the feature.

If you would like to learn more about any new feature, please contact the MCIX support team on support@mcixportal.com who will be happy to answer any questions you have.

[MCIX-2883] – Mobile App Issue - Need to do login process again after "Lock App" the application

We got user feedback that they faced the inconvenience condition after the Lock app process. They have to do login process by enter the username and password when enter the app after the lock app process instead of only enter PIN.

We fixed this inconvenience condition by reducing the width and fitting with text size of the "Forget PIN?" button to avoid to press the button and do login process again.
