## 1. Release Notes Overview

The Release Notes are a comprehensive overview of the new features and functionality added or enhanced as part of MCIX's latest release. These notes are designed to give you all the information you need to immediately understand and start benefitting from the new features.

For each new feature, we give a high-level description of the functionality, and provide a step-by-step walkthrough, along with screenshots of how to start using the feature.

If you would like to learn more about as details, please check the user guides

[https://www.mcixportal.com/files/ugd/4bd6d1\\_b7fd88f275b6468a9e510b2f7cb28e19.pdf](https://www.mcixportal.com/files/ugd/4bd6d1_b7fd88f275b6468a9e510b2f7cb28e19.pdf) and

feel free to contact the MCIX support team on support@mcixportal.com who will be happy to answer any questions you have.

## 2. New functionality

ThitsaWorks provides financial technology solutions for Microfinance Institutions to collect, manage and analyze data needed to run effective operations and to manage risks. We are passionate about solving complex business and social challenges using data as a tool.

### 2.1 Download from Play Store/Apple Store

Users can download from google play store or apple store on your mobile by texting “MCIX” in the search bar. Then users can install the application.

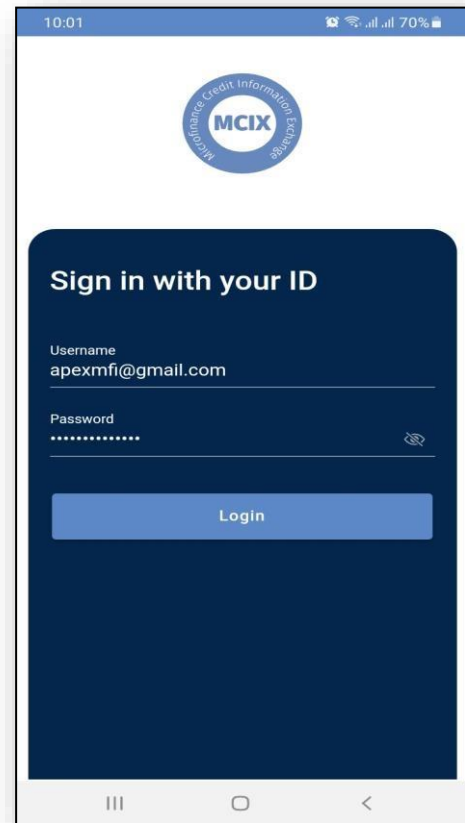

Note:

- There is no limitation when VPN on or off while downloading and using the MCIX application for Android.
- For iOS users, VPN must be off and apple id account be **Myanmar** location as they can search “MCIX” in the apple store.
- If iOS users can't search MCIX app in apple store, please check in your account setting and change Country/region to “Myanmar”.

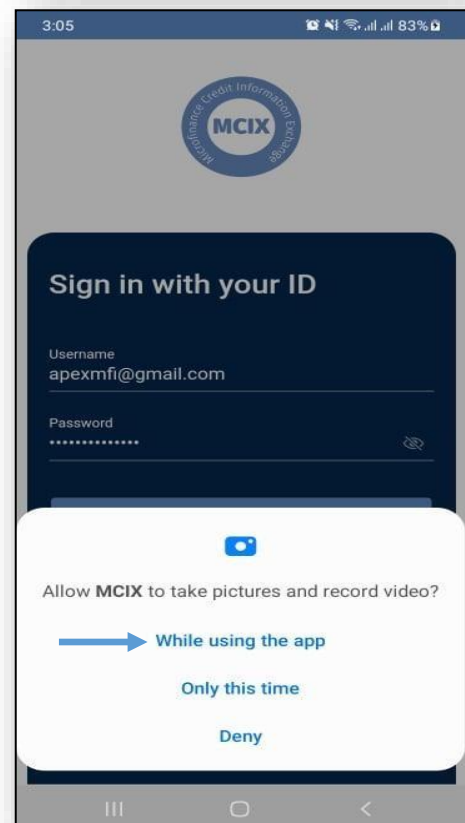

## 2.2 Sign in with ID

- In first screen, user can easily type “Username” and “Password”.
- Click on “Login” then continue the next process.

## 2.3 Allow Permission

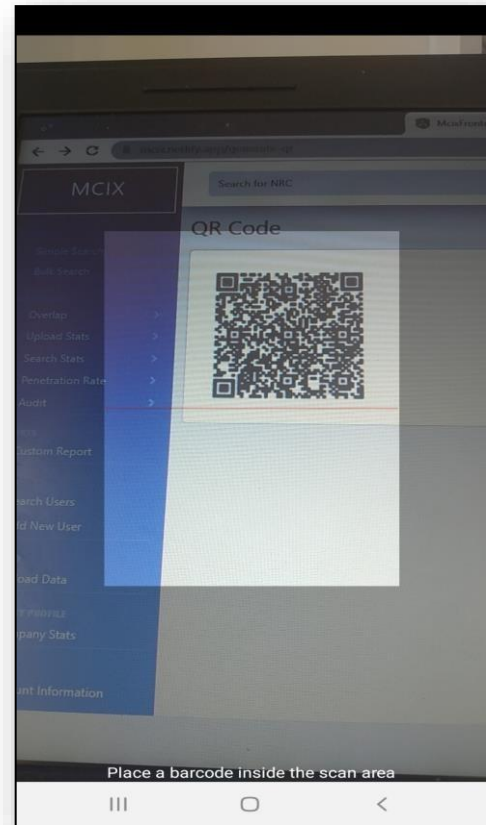

- After login process, user see the permission box to allow MCIX application for taking picture and recording video.
- Choose “While using the app” then go to next process.

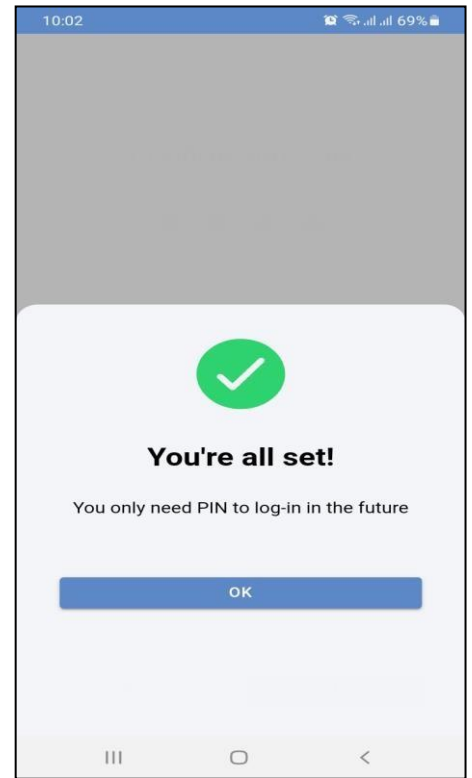

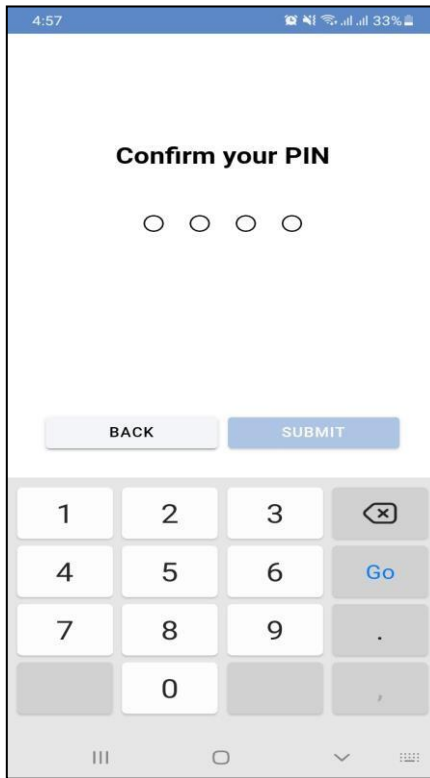

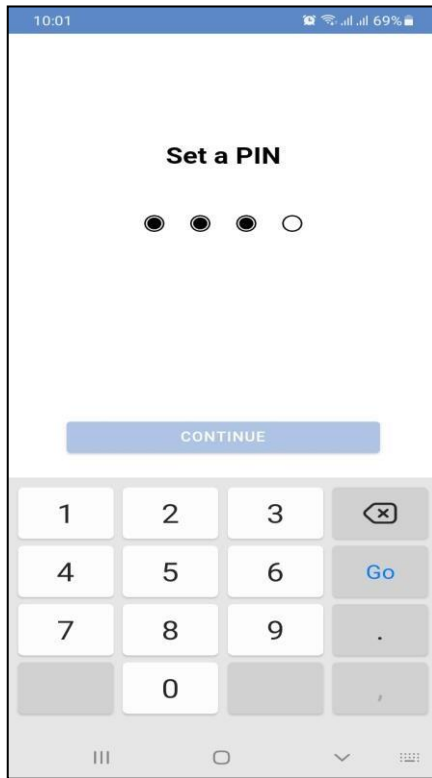

## 2.4 Scan QR code

- First, user needs to go to the web portal of MCIX.  
(<https://live.mcixportal.com/#/> )
- Click on “User Profile” and generate QR code.
- User can make scanning the QR code on the web portal of MCIX as shown the following image.

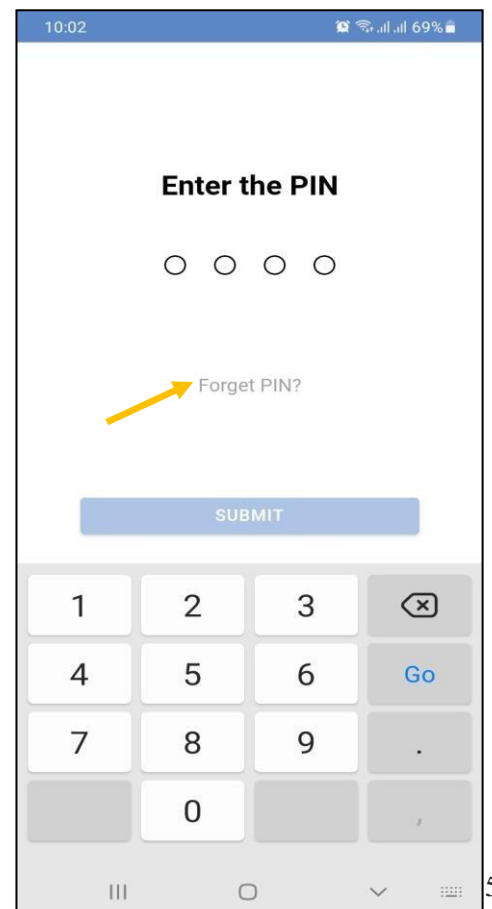

## 2.5 Pin Set Up

- As soon as scanning the QR code is completed, user can do “Pin” set up function.
- User can set up “4” digits. Then click on “Continue”.
- User needs to confirm the same “Pin” again as shown in second image. Then click on “Submit” to continue the next process.
- After that, system shows your pin set up is done in the third image below.

## 2.6 Enter the system

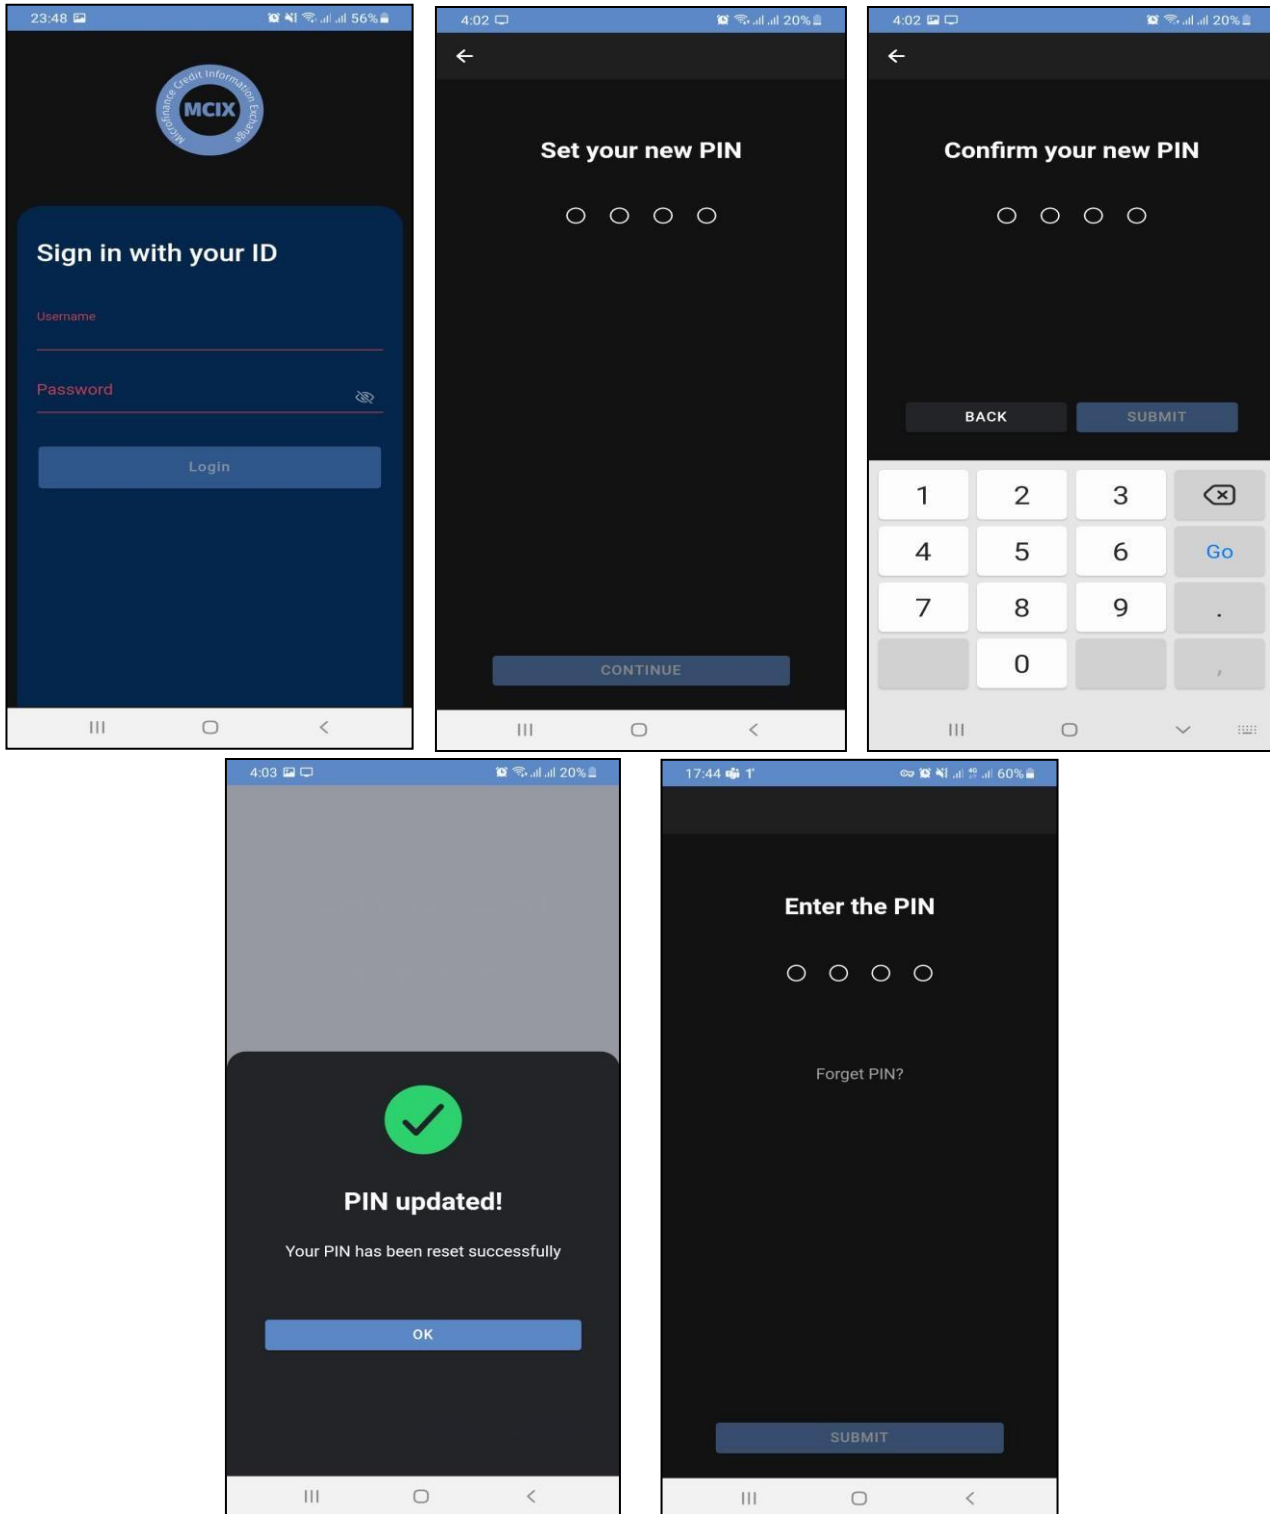

- User needs to type again “Pin” to enter the system. (User can use this set up “Pin” numbers when he enters the system next time.)
- If user forgot the “Pin”, you can click on “Forget Pin” option.

## 2.7 Forget Pin

- If user forgot the “Pin” to enter the system, user needs to sign in with your ID again and set up a new “Pin” (4 digits).
- Need to confirm by typing the same “Pin” then click on “submit” to update reset successfully then enter the system.

## 2.8 Welcome Screen
